EIZ SPARK Inspire Speakers

Keynote
Eve Büchner
CEO of quantumReality

Eve is an entrepreneur, investor, and business angel. In 2011 she founded the venture capital holding quantumReality, where she has served as CEO ever since. In 2012, quantumReality became the majority shareholder of refund.me GmbH, which grew into a leading international company helping air travelers enforce their passenger rights. In 2014 she founded refund.me Group, Inc. in Palo Alto, CA. Recognized by the Financial Times as a "Legal Industry Pioneer", the company was successfully sold in 2018. Since then, Eve has focused on science venture capital, investing in quantum technology, materials science, and organoid intelligence. Since 2021, she has served on the board of Business Angels Berlin-Brandenburg. In 2024, she was named Business Angel of the Year. Since 2025, quantumReality has partnered with Humboldt Innovation Berlin to bring deep-tech innovations to market.

Keynote
Kolja Wetzel
CEO of Scanrgy

Kolja Wetzel is the founder and CEO of Scanrgy UG in Berlin. He combines research, energy expertise and entrepreneurship with the aim of accelerating the heating transition in a data-driven way. Before founding Scanrgy, he worked for companies including Vattenfall Wärme Berlin AG and BEW AG, where he focused on analysing heating demand based on geospatial and image data. He also worked at TU Dresden in the field of building energy technology and heat supply. With Scanrgy, he is developing AI-supported methods for building-specific analysis of building stock for municipal heat planning, renovation and decarbonisation.

This project is funded by the German government with funds from the Structural Development Act (Strukturstärkungsgesetz) for coal-mining regions and co-financed with funds from the state of Brandenburg.
